Hi –

I only just now came across the attached article (which I guess I can access only because I have an ESA membership). I have not yet read it through but thought I would share in case it sheds any new light on the situation. At the very least, it seems to be an interesting read and is a rare example of an article about this topic that has both an economist and an etomologist as authors (well, rare outside BEAD, that is 😊). Its funny how I keep coming across stuff that Florida's gov't staff don't seem to be aware of, btw 😊

Regards, Nikhil

Hi Caleb,

Attached is the S18 Belay label for clothianidin/citrus.

Subject: Current FL Section 18 Belay label?

Hi Stacey!

Could you please send a FL Section 18 Belay label if you have it handy? OPPIN query is down and the label would help in our PRP review.

Thanks.

Caleb
